

restrack

resource manager

Coopz Consultancy presents :: Restrack - online

Introduction

Restrack is a web-based solution designed to be the mission control of all projects within your business. It allows all staff to maintain an up to date overview of their individual situation within the organization. Management can oversee the activity within the business without actually being in the office as well as gauge the productivity of staff without the need for meetings. It also allows employees the opportunity to logically organise their workflow through the centralized use of a single tool.

Increase Productivity

Restrack is a powerful solution, which has the potential to increase your productivity substantially, equating to better quality, and faster delivery of projects. Restrack helps to make the most of your company's time by efficiently managing your workflow. Managing time effectively within your company will help deliver projects on time, on budget and therefore increase profitability. Restrack is a web-based solution that allows you to see the activity within your company in real-time. Whether you need to create jobs, track time, store information, assign work to staff or contractors, or simply regain control, Restrack will come to the rescue!

Easy to Implement

Setting up Restrack is simple. Instructions and a user manual are available from the restrack site as download packages. As well as the manuals onsite support and training is available for a fee. The solution is very easy to integrate into daily operations. It is intuitive to use, allowing managers the ability to have oversight of activity, office staff the ability to take calls and log jobs, the accounts department the ability to interact with the system and employees to see only what they need to see, in order to manage their work and track their time. If you require further help with setup, training or wish to customize the solution to meet your needs, we are more than willing to take any suggestions and if warranted will incorporate the changes into the final product. Because the whole package is hosted and maintained for you there is no need for expensive hardware or technical support.

Complete Reporting and Measurement Tools

Restrack has a reporting section that allows you to produce reports on any particular job, client history, current work in progress, staff performance etc. These reports can help you assess your company performance, giving you the ability to measure and analyze areas that can be streamlined to improve your productivity.
